metavet-project.eu
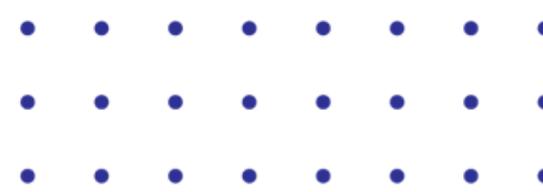

Your students are trained on equipment industry stopped using years ago.
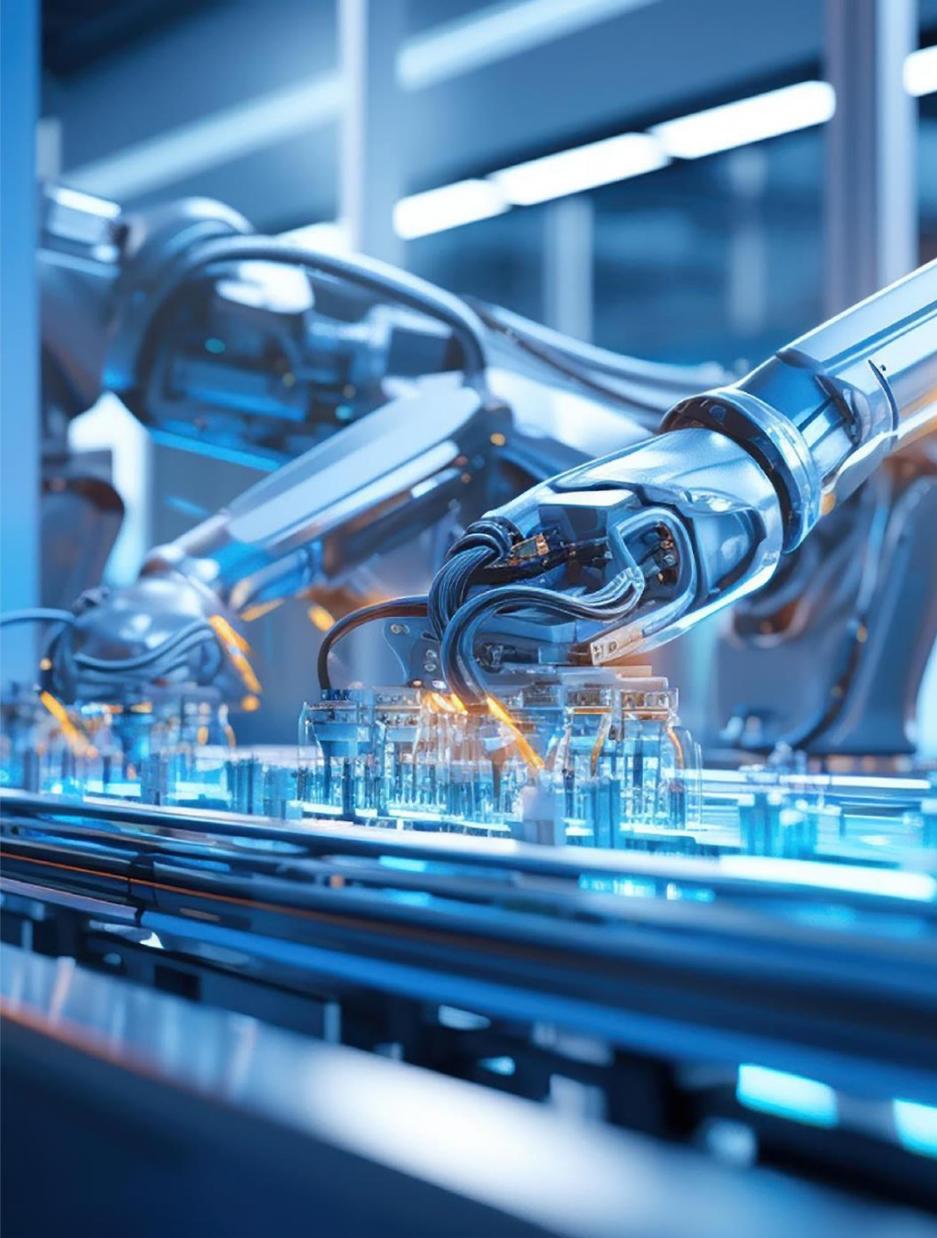

And companies know it.

The real problem VET schools face

VET schools everywhere struggle with the same issues:

- Outdated lab equipment

- No access to industrial robotics

- Teachers teaching theory instead of practice

- Students graduating without job-ready skills

- Companies losing interest in partnering with schools

Co-funded by
the European Union

This gap creates a serious problem:

- Students are not prepared for real industrial environments.

- Schools cannot afford modern labs.

- Industry cannot find skilled operators.

Everyone loses.

The Solution

MetaVET brings real industrial cobot training into VET education — without needing a physical cobot lab.

Through VR and remote access, students and teachers can train on real industrial robotics in a safe, scalable virtual environment.
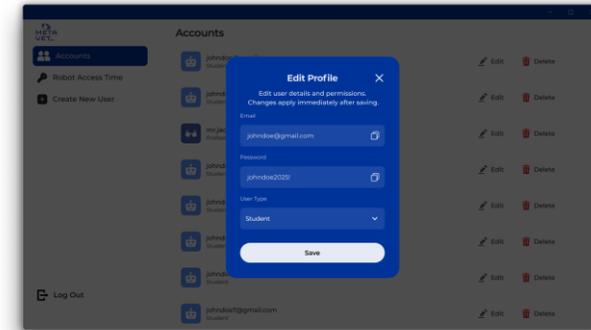

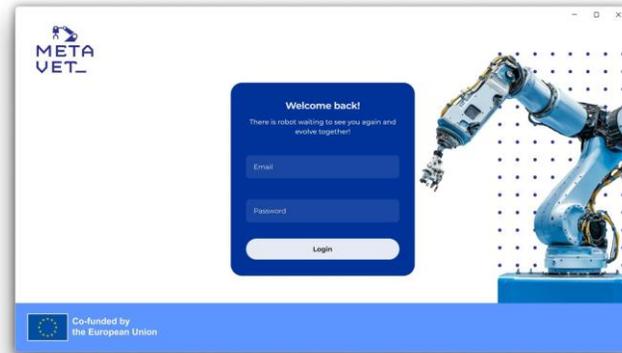

# What teachers and students can actually do with MetaVET

With MetaVET, they can:

- Operate real industrial cobots remotely

- Practice procedures safely in VR before touching real equipment

- Learn real industrial workflows, not simulations

- Train anytime, without lab limitations or safety risks

MetaVET is for VET schools that want to:

- Modernize their curriculum without investing in expensive equipment

- Offer students real, industry-aligned skills

- Attract and retain industry partnerships

- Support teachers with modern teaching tools

Why you can trust this platform

MetaVET is developed and tested by a strong European partnership:

- **ICEBERG PLUS SRL** – Platform developers & project lead
- **AREA S.A.S.** – Online curriculum & dissemination
- **FabLab BA** – Technical cobot experts and cobot owners
- VET schools from Montenegro and Bosnia & Herzegovina
- Curriculum experts from SSST University

This is not a concept. It is already running in real VET schools.

Join the MetaVET Pilot

We are onboarding new VET schools and industry partners.

During the pilot phase, you receive:

- Free access to the MetaVET platform
- Onboarding session for teachers
- Support to run your first MetaVET class
- Direct connection to industry use-cases

Book a 15-minute demo for your school or company.

See how MetaVET can modernize VET training without buying a single cobot.

Let's bring real industry into your classroom.
